

RIYA MOTGHARE

B.Tech – Data Science

Mumbai, India | +91 89288 27763 | Email | GitHub | LinkedIn | Portfolio

PROFESSIONAL SUMMARY

Data Science undergraduate with hands-on experience in Python, SQL, application development, and analytics. Familiar with system resource monitoring, basic network diagnostics, database operations, and troubleshooting through practical projects. Interested in system engineering, IT operations or data science roles.

EDUCATION

B.Tech in Data Science

2023 – 2027

Usha Mittal Institute of Technology, SNDT Women's University, Mumbai

WORK EXPERIENCE

AI-ML Intern

June 2026 – July 2026

Global Next Consulting India Private Limited (GNCIPL)

Remote

- Completed a six-week Professional Industrial Internship Program (PIIP-2026), aligned with NCS standards, under Ms. Anuradha Gupta.
- Completed six practical projects involving exploratory data analysis, clustering, machine learning classification, and SQL analytics.

PROJECTS

Sentinel Eye – Real-Time Violence Detection System

January 2026 – Present | GitHub

Flagship project under Prof. Poonam Dharpawar (with Diksha Anglekar & Ankita Vishwakarma)

- Developed a CNN-LSTM and YOLOv8n pipeline for violence classification, object detection, and tracking using 350 video clips.
- Integrated models into a Flask and React 19 + Vite application with alert logging; IEEE-format paper in progress.

SMS Spam Classification

July 2026 | GitHub

Python • NLP • TF-IDF • T5 • Scikit-learn • Streamlit

- Built an SMS spam classifier using TF-IDF and machine learning, achieving ROC-AUC 0.9929 with T5-based data augmentation; deployed an interactive Streamlit app.

ANN-Based Customer Churn Predictor

June 2026

Python • TensorFlow/Keras • Scikit-learn • Pandas

- Developed an artificial neural network on the Telco Customer Churn dataset, achieving 77.79% accuracy and ROC-AUC 0.83.

IT Support & System Health Monitoring Tool

September 2026

Python • Streamlit • psutil • SQLite

- Built a dashboard to monitor CPU, memory, disk usage, system details, and configurable resource-threshold warnings.
- Implemented basic ping diagnostics and persistent support-ticket creation, filtering, and status updates using SQLite.

TECHNICAL SKILLS&

- Programming:** Python, C++, SQL, PostgreSQL, SQLite
- Database Management:** MySQL, PostgreSQL, DBMS, CRUD Operations, Joins, Subqueries, Query Writing
- Operating Systems:** OS Fundamentals, Linux/Unix, Bash, Command-Line Interface (CLI), Process Management, Memory Management, File Systems
- Computer Networks:** CN Fundamentals, TCP/IP, DNS, DHCP, IP Addressing, Routing & Switching Fundamentals, Subnetting, Network Troubleshooting
- Software Engineering:** Object-Oriented Programming (OOP), Data Structures & Algorithms, SDLC, Software Testing, Debugging, Problem-Solving
- Web Technologies:** HTML, CSS, Flask, REST API Fundamentals
- Cloud & Infrastructure:** Cloud Computing Fundamentals, IBM Cloud, Microsoft Azure Fundamentals, Virtualization Concepts
- Tools & Platforms:** Git, GitHub, VS Code, Jupyter Notebook, Linux Terminal
- Data & AI:** Data Analysis, Machine Learning Fundamentals, Generative AI Concepts
