

RIYA MOTGHARE

Mumbai, India | +91 89288 27763 | riyamotghare27@gmail.com | github.com/riyamotghare | [LinkedIn](#) | [Portfolio](#)

Objective

Final year Data Science student seeking an **ML / Data Science Internship** related technology roles to apply deep learning expertise in real-world settings. Hands-on experience building CNN-LSTM video surveillance pipelines, transfer learning classifiers, and data analytics projects, with a focus on edge AI and physical security applications.

Education

Bachelor of Technology in Data Science 2023 – 2027
Usha Mittal Institute of Technology, Mumbai *Final Year*

Relevant Coursework: Machine Learning · Computer Vision · Database Management · Statistics · Python Programming

Technical Skills

AI / ML	Deep Learning (CNN, LSTM, TimeDistributed), Computer Vision, Transfer Learning (MobileNetV2, YOLOv8), Video Frame Processing, Model Debugging, Error Analysis, Prompt Engineering, API Integration
Libraries	TensorFlow, Keras, OpenCV, Scikit-learn, Pandas, NumPy, Matplotlib, Seaborn
Analytics	Power BI, Power Query, DAX, Tableau, SQL, Microsoft Excel
Programming	Python, PostgreSQL, Basic R, SQL, HTML/CSS
Tools	Jupyter Notebook, Google Colab, VS Code, GitHub, Kaggle, Figma

Projects

Sentinel Eye — AI Violence Detection System <https://github.com/riyamotghare/Sentinel-eye>

Python · TensorFlow · Keras · OpenCV · CNN · LSTM · YOLOv8

- Built a CNN+LSTM pipeline using TimeDistributed Conv2D (32 filters) + LSTM (64 units), extracting 16 frames/video at 64×64 resolution — achieved **100% validation accuracy**.
- Integrated YOLOv8n for real-time object detection; built live camera-feed module, automated alert system, and CSV-based detection logging pipeline.

HR Analytics Dashboard <https://github.com/riyamotghare/hr-analytical-dashboard>

Power BI · Power Query · DAX · Excel

- Built an interactive HR Analytics Dashboard in Power BI to analyse employee attrition, workforce demographics, and performance metrics.
- Performed data cleaning and transformation using Power Query and created DAX measures for KPI calculations and dynamic visualisations.

DDoS Attack Volume Analysis <https://github.com/riyamotghare/DDoS-Attack-Volume-Analysis>

Python · Pandas · Matplotlib · Scikit-learn · CIC-IDS2018

- Analysed **1M+ network-flow records** from CIC-IDS2018; delivered EDA covering attack-volume trends, protocol breakdowns, and outlier detection across multiple DDoS vectors in a modular OOP Python script with automated chart exports.

Equipment Monitoring & Fault Detection Dashboard MySQL · SQL · MySQL Workbench

- Designing a MySQL database to store equipment logs, sensor readings, and maintenance records for monitoring system health.
- Building SQL queries and reporting views to identify equipment faults and visualize maintenance trends.

Data Breaches Analysis by Industry <https://github.com/riyamotghare/Blockchain-Anti-Phishing-System>

Python · Pandas · Matplotlib · OOP

- EDA on 352-row breach dataset (2004–2022); identified high-exposure sectors and breach-type trends using a zero-dependency OOP architecture with Matplotlib-only visualisations.

Blockchain Anti-Phishing System github.com/riyamotghare/Blockchain-Anti-Phishing-System

Python · Blockchain · Firebase · URL Analysis

- Built a decentralised URL verification system storing phishing URLs on a blockchain ledger backed by Firebase for tamper-proof, real-time threat detection.

Experience

Data Science Trainee — GNCIPL (Global Next Consulting India Pvt. Ltd.) 2025
Mumbai, India *Training Program*

- Delivered DDoS Attack Analysis and Data Breaches Analysis end-to-end: data ingestion, EDA, modular OOP scripts, Matplotlib visualisations, documented GitHub repositories.
- Presented analytical findings to senior mentors; practised data storytelling and communication of technical results to non-technical stakeholders.

Certifications & Additional Information

- **Exploratory Data Analysis for Machine Learning** — IBM via Coursera March 2025
- **Extracurricular:** Sports Council Creative Team, UMIT (2024–2025)
